UNIVERSITÀ DI PISA

Deparment of Information Engineering
Artificial Intelligence and Data Engineering course
Large-Scale and Multi-Structured Databases

SYP - SHARE YOUR PLAYLIST

Application developed by
Lorenzo Massagli, Antonio Patimo, Fabio Buchignani

Application guide

This guide will show the functionalities of the application.

To use the application locally, both the Angular front-end and Java back-end must be started.

The device on which the application will run must be connected through VPN to the UNIPI network, so that the application can connect to the remote servers.

To test the application, the user can subscribe to the platform or use one of the following credentials:

Account type	Username	Password
Admin account	admin	admin
Normal account	test	test
